CONNECTED FUNCTIONS

- Vehicle sales create the customer relationship and begin the transaction.
- Dealer-carried financing and collections extend the operating relationship beyond the sale.
- The service operation supports vehicle ownership and connects back to the dealership experience.

IMPORTANT CONTEXT

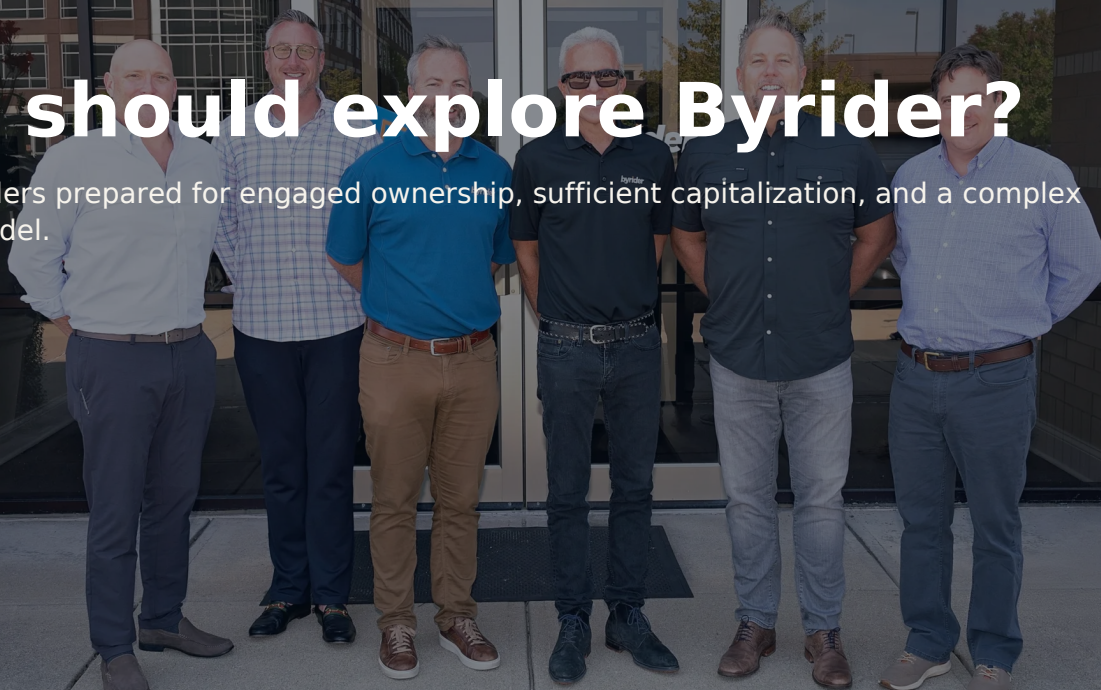

- Results are not guaranteed.
- Financial performance representations belong in Item 19 of the current FDD.

A DIFFERENT KIND OF AUTOMOTIVE FRANCHISE

This guide helps you understand the operating model, identify the questions that matter, and prepare for formal review of the current Franchise Disclosure Document.

Who should explore Byrider?

Business leaders prepared for engaged ownership, sufficient capitalization, and a complex operating model.

POTENTIAL FIT

- Experienced dealer principals evaluating dealer-carried finance.
- Finance, lending, or collections leaders with strong operating discipline.
- Multi-unit owners who know how to build teams and execute systems.

OPERATING STANDARD

- Engaged leadership
- Financial management
- Team development
- Disciplined execution

YOUR BACKGROUND CAN BE DIFFERENT

Training supports the model, but no background or system guarantees results.

Support across the operating journey

You own the decisions. You do not have to build every function from scratch.

DEVELOPMENT

- Market evaluation, site selection, facility planning, and opening preparation.
- Training in sales, service, finance, accounting, compliance, and management.

ONGOING

- Marketing strategy and professionally developed campaign resources.
- Executive Franchise Consultants and functional experts for ongoing guidance.

BUILT FOR OPERATING DECISIONS

Byrider franchise owner Dale Boone describes support that helps turn operating data into actionable tactics.

Technology built around the model

Discover brings vehicle sales, financing, collections, customer communication, reporting, and compliance into one integrated platform.

CONNECTED VIEW

- The goal is a shared operating view across the connected functions of the dealership.
- Illustrative image. Not an actual franchisee, employee, customer, or location.

FUNCTIONS

- Sales and inventory
- Financing and collections
- Service and customer communication
- Reporting and compliance

NO PERFORMANCE SHORTCUT

Technology supports execution; it does not replace disciplined management or independent diligence.

Investment questions to answer early

The current initial franchise fee is \$60,000 for a first location and \$35,000 for each additional location purchased.

PLAN FOR

- Market and facility
- Inventory and staffing
- Technology and working capital
- Funding for the receivables portfolio

CURRENT TERMS

- Byrider currently lists ongoing royalties of 2.5% of gross vehicle sales and 1% of collections.
- Review Item 7 of the current FDD for complete estimated investment information, assumptions, caps, and obligations.

FINANCING IS NOT GUARANTEED

Byrider does not provide or guarantee franchisee financing; lender decisions remain subject to lender requirements and approval.

Your diligence roadmap

A serious franchise decision should become more specific at every step.

01

Review the guide

Write down the assumptions you need to test.

02

Discuss the fit

Share your background, market interest, timeline, and operating role.

03

Review the current FDD

Examine Items 7 and 19 with qualified legal and financial advisors.

04

Validate the opening plan

Confirm territory, site, financing, development, staffing, inventory, training, and launch requirements.

Byrider Franchise Guide

READY TO TEST THE FIT?

Bring better questions to the conversation.

A guide can organize your questions. The current FDD, independent advice, and candid operating conversations should answer them.

1 Know your market interests

Identify where and how you want to operate.

2 Know your role

Decide how engaged you plan to be in day-to-day leadership.

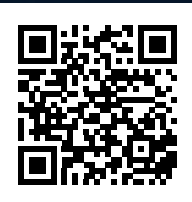

3 Know what must be verified

Use Items 7 and 19 and qualified advisors before deciding.
